Amazing wine experiences in Portugal

Part-Time Summer Remote Internship, Part-Time Internship/Employment

Job Title

Part-time/summer remote internship or part-time employment

Job Description

We are an online booking platform to book experiences at wineries across Portugal.

We are looking for a person who is highly motivated with some IT skills to work on the back office for our site and APP mainly for data entry including texts, photos, and a number of other entries prior to launching on the site.

If the individual has marketing or sales experience these could also be useful as we are also looking for some digital marketing experience as well as assistance in writing content for our site and also perhaps going to speak to partners and distribute brochures. This would be to assist in increasing our brand awareness and increasing targeted traffic to our website and downloads of our APP.

There may be freedom to also have involvement in other areas of the business based on the background of the individual. The job will be mostly remote but may include occasional face to face meetings or video meetings. Some visits to partners and wineries close to Lisbon may be possible as training experience should the individual live in Lisbon.

Location

Lisbon Portugal or Remotely is also fine as most of the work will be remote based work.

Conditions / Salary Information

As it's a estagio curricular no salary is planned. Should the Internship turn into some part-time work later this could include some payment. This will be based on the background of the individual. Any travel or expenses will be covered by the company.

Desired skills and background:

Some ICT background including worked on back offices for websites, data entry work, and also connections and interfaces to other systems such as for marketplaces which include connections to billing system

Some sales or marketing background including being able to speak at ease with different people and be outgoing and positive minded. Any digital marketing experience would be welcome.

Qualifications

Some ICT background including worked on back offices for websites, data entry work, and also connections and interfaces to other systems such as for marketplaces which include connections to billing systems.
